Goals

During this course, students will inhabit professional art skills in the areas of painting, drawing, sculpting, crafting, drafting, comics and video. Students will be encouraged to explore different techniques, while creating their own unique art projects. I hope to help them increase their self-expression, engage in the visual area of the brain and improve the overall capacity for learning. Students will be taught in a workshop format in class where we will learn the skills for a 2-hour period.

Students who have taken this course prior are welcome to join us again, as we will be building on their previously gained knowledge and adding new skills. We will also be attempting to enter art pieces in galleries, shows and fairs this year.
